Update on the DR 3447

The new Colorado Crash Report Form and DOR Reporting System

October 2019

The DOR Crash Reporting System Now Accepts the DR 3447

What you Need to Know:

- Both electronic and paper/PDF versions of the DR 3447 are now being accepted by the Department of Revenue (DOR).

- The DR 2447 will also still be accepted but only for a limited time, beginning October 1, 2020 the DR 2447 acceptance by DOR will start to be phased out.   If this is going to create a challenge to your agency please contact DOR at: Dor_drives_interfaces@state.co.us

- Agencies that submit the DR 2447 electronically to DOR need to work with their RMS vendor to make adjustments for submitting the DR 3447 ASAP.

Where to Find the Details

You'll find the following on the STRAC website (https://www.codot.gov/about/committees/strac/dr3447-the-new-state-of-colorado-traffic-crash-report-form-1)

- Information on the DR3447, including a PDF of the form, the associated data model, and the Investigating Officer's Manual.

- A video that highlights the major changes from the DR 2447 to the DR 3447. (https://www.codot.gov/about/committees/strac/dr3447-the-new-state-of-colorado-traffic-crash-report-form/using-the-dr3447/training-videos-dr-3447)

Specifications for RMS vendors and agencies to make proper adjustments to submit the DR 3447 to DOR and how to conduct testing.
- For agencies collecting crash report data electronically, the RMS and/or Crash Reporting module will require modifications for the new form. Discuss with your RMS vendors *now* about the transition to the DR 3447, specifically covering:
    - Collecting the data to populate the modified form.
    - Printing out the data in the standard format.
    - Submitting the electronic form data to DOR.
      Determining if maintenance contracts cover the development of the DR 3447 or if a new contract is needed.

- For technical support in transitioning to the DR 3447 you may contact DOR at: Dor_drives_interfaces@state.co.us

Potential Funding

Agencies that want to start collecting and submitting crash data electronically may be eligible for funding. STRAC funding is available to assist agencies with projects such as acquiring or implementing e-crash that includes electronic submittal of these records to DOR.

Agencies already collecting and submitting electronically may be eligible for funding to support their transition to the DR3447.

More information is available the STRAC website (https://www.codot.gov/about/committees/strac)

How to Stay Up-to-Date

- You can find up-to-date information on the DR 3447 crash form, FAQ's, the DR 3447 crash form, updated officer manual and DR 3447 data model at the STRAC website (https://www.codot.gov/about/committees/strac/dr3447-the-new-state-of-colorado-traffic-crash-report-form-1)

- We will periodically send information out through the same channels as this newsletter. If you want to be added to the mailing list, let us know by emailing STRAC at: dot_hq_strac@state.co.us.
