Division of Project Support

Standards and Specifications Unit

## MEMORANDUM

**DATE:** October 20, 2016

**TO:** All Holders of Standard Special Provisions

**FROM:** Larry Brinck, Standards and Specifications Engineer

**SUBJECT:** Revision of Section 105, Hot Mix Asphalt Pavement Smoothness

Effective this date, our unit is issuing a revised version of standard special provision, Revision of Section 105, Hot Mix Asphalt Pavement Smoothness. This revised standard special provision is 6 pages long and replaces a standard special provision having the same title dated May 8, 2014.

Use this revised standard special provision in projects having HMA pavement, beginning with projects advertised on or after November 17, 2016. You are free to use this standard special provision in projects advertised before this date.

The revisions contained in this version switch to MRI from HRI to match the pavement management and pavement design smoothness index. They also eliminate disincentives and localized roughness. They also allow for single wheel-path grinding.

Those of you who keep a book of Standard Special Provisions should replace the now obsolete standard special provision with this revised version. For your convenience, you can find this and others special provisions issued this date in one place at our Construction Specifications web page:
