2829 W. Howard Place
Denver, CO 80204-2305

DATE: July 31, 2019
TO: Writers and Users of Special Provisions

FROM: Shawn Yu, Standards and Specifications Unit
SUBJECT: Use of Special Provisions with the 2019 Standard Specifications book

STANDARD SPECIAL PROVISIONS

The standard special provisions listed on the attached index, all dated October 1, 2019, have been issued for use with the 2019 edition of the Standard Specifications for Road and Bridge Construction. Use the standard special provisions according to the instructions on the index.

Copies of the standard special provisions may be printed or downloaded from the Construction Specifications page of CDOT's website.

PROJECT SPECIAL PROVISIONS

Project special provisions that worked with the 2017 Specification Book may not work with the 2019 Specification Book. In some cases, all or part of the revisions in a project special provision may have been incorporated into the 2019 Specification Book. In other cases subsection numbers have changed due to added provisions. Before using old project special provisions with the 2019 Specification Book, compare them with the book. Make sure that they are still needed and that they modify the correct subsections. Persons that maintain project special provisions for their organization to disseminate for use on appropriate projects should check them and revise them as necessary for use with the 2019 Specification Book.

Sample project special provisions and worksheets for the project special provisions that are compatible with the 2019 Spec Book common to most projects can be found on the Construction Specifications page of CDOT's web site.

IMPORTANT REMINDERS:

- All new or revised project special provisions should be reviewed by the Standards and Specifications Unit before use. Contact Shawn Yu [303-757-9474] or Andrew Pihaly [303-757-9402] for assistance.
- The Department of Transportation will begin use of the 2019 edition on all projects advertised for bids after October 1, 2019. The PDF is available now online.
