**Description of the product:** (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)
Right Pointe Company's # 3405 Regular is a hot-applied asphalt based joint and crack sealant. # 3405 Regular is formulated with thermoplastic polymers and stabilizers. #3405 Regular meets requirements of ASTM D 6690, Type II. The maximum safe heating temperature is 410°F and the recommended pour temperature is 370°F - 390°F. For proper installation the crack or joint must be clean and dry immediately before product installation.

**Restrictions,** (installation and/or use):
The pavement temperature must be above 40°F.

**Use of the product**, (be specific to CDOT highway activities only):
Used to seal cracks or joints in asphalt and concrete pavement.

**Benefits to CDOT**, (how will your product enhance quality, improve safety, save money, be a better value then other manufacturer's products):
# 3405 Regular is an economical sealant that saves the contractor's time. It is formulated to melt quickly, pour easy and set up fast.

**Specifications**, (listing those applicable is required) **& Certificate of Compliance** (required to certify compliance with listed specifications):

- [x] CDOT : Standard Specification, Section 702.06
- [x] ASTM : D 6690, Type II
- [x] AASHTO : M 324, Type II
- [ ] FHWA :
- [ ] other :

**Product testing,** (from national/independent laboratories or universities) **& Certified Test Report** (CTR required to validate all claims):

- [ ] NTPEP-AASHTO :
- [ ] FHWA :
- [x] other : Indevcon, Inc. (6-18-2012)
- [ ] other :

**State DOT Approvals**, (current documentation required):

Sample submitted: [ ] yes [x] no [ ] n/a | Materials Safety Data Sheets (MSDS): [x] yes [ ] no [ ] n/a

Notes/Additional Comments
