

This document guides you through placing Greek characters within the MicroStation text editor. The characters can be placed within the typed text string with this procedure.

Available Characters

- The following is a list of available characters in the GREEK font (Font 5).

Note: This Graphic shows what Keyboard Characters will produce the desired Greek Character. The Keyboard characters will show up in the **Text Editor** Dialog Box when placing and editing these characters. The actual Greek Character will show up in MicroStation and print.

Placing Text with Greek Characters

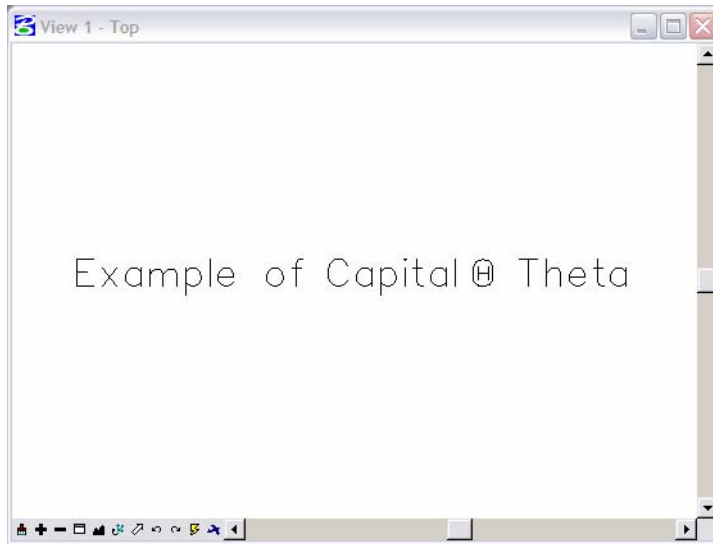

- When placing text through the MicroStation Word Processor, switch the Font to Font 5 (GREEK), and type appropriate character from above. You can switch back to the original font to continue typing text.

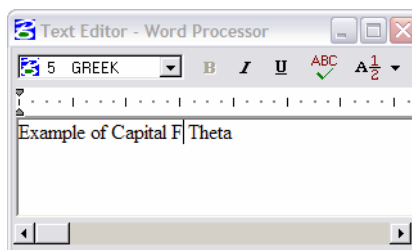

CDOT Greek Characters.pdf

3. Example of text placed in MicroStation.

4. Example of text being edited with MicroStation **Text Editor**.

Note: The keyboard character displays in the editor, not the actual Greek Character.
