RE: Determinations of Eligibility and Effects and Notification of Section 4(f) *De Minimis*  
Finding  
CDOT Project C C080-030, Various Culverts, Garfield and Mesa County

Dear Ms. Hann,

In response to your letter and materials dated June 27, 2018 regarding the project referenced above, I have reviewed the materials on behalf of the City and the Grand Junction Historic Preservation Board. The City is in agreement with the Determinations of Eligibility, Determinations of Effect and the finding of no adverse effect to the potentially-eligible properties in the locations listed and depicted in the materials. However, the City or County Board may consider designation of these in the local register if requested by the property owners in the future. In addition, it is understood that if a potential resource is uncovered during construction on the sites, the City recommends contacting History Colorado immediately at that time.

Thank you for the opportunity to review these materials. Please do not hesitate to contact me at 970.244.1491 or [kristena@gjcity.org](mailto:kristena@gjcity.org) if you have questions about this response.

Sincerely,

A handwritten signature in black ink, appearing to read "Kristen", is written over a light blue circular stamp.
