

Cumulative Project Requests and GHG Effects

If submitting multiple project waivers, please list the projects and their cumulative GHG impact.

Individual Project Waiver Components

1. Description of project that the agency is requesting funding for and why the Transportation Commission should grant a waiver for said project.
2. The total GHG increase of the project in comparison to the reductions needed.

These numbers are purely illustrative. Numbers will also be found in the GHG Transportation Report.

Category	2025	2030	2040	2050
Required Reductions	270,000	820,000	630,000	370,000
Reductions achieved by plan	250,000	815,000	630,000	370,000
Total reductions needed	20,000	5,000	0	0
GHG increase of Project A	100	200	100	0

3. Demonstration of how the agency attempted to meet the reduction targets with significant effort, by placing priority on projects and mitigation measures that reduce GHGs. Agencies may refer to sections in the GHG Transportation Report.
