## REGION: 01

### Region 1 Rockfall Mitigation Pool

The CDOT Rockfall Program was created in 1996 to track rockfall information, implement a rating system, and mitigate potential hazardous areas. To determine which sites statewide are of high priority, several factors are analyzed, including slope profile, geological characteristics, and traffic statistics. This information is then incorporated into the Colorado Rockfall Hazard Rating System, and the sites are prioritized and selected on their ratings. CDOT Regions receiving rockfall mitigation funding STIP the funds into the Regions Rockfall Mitigation Pools.

**Safe Routes to School  
Region 2 Pool**

Today, more than ever, there is a need to provide options that allow children to walk and bicycle to school safely. Many communities struggle with traffic congestion around schools and motor vehicle emissions polluting the environment. At the same time, children in general engage in less physical activity, which contributes to the growing epidemic of obesity. At first glance, these problems may seem to be separate issues, but Safe Routes to School (SRTS) programs can address all these challenges through a coordinated action plan. This pool is funding for these types of activities.
