

## Traffic Control Supervisors Training

**COST:** \$250 per Participant (2017 Price)

**CLASS SIZE:** Minimum 1, Maximum 5

**TRAINING LEVEL:** Basic

**DESCRIPTION:** This course is designed to give participants state-of-the-art knowledge of the entire process of planning, designing, installing, maintaining and monitoring traffic control for work zones. This training is offered to anyone responsible for any phase of construction and maintenance operations. These principles, applied to maintenance and construction operations can save your organization many times the cost of the course by helping avoid tort claims and liability judgments. This short course is a basic requirement essential to all persons involved in street and highway work. Several workshops included in this course use teambuilding and presentation of solutions to provide hands-on experience with implementing and modifying temporary traffic control plans for various real life situations.

### TARGET AUDIENCE

In order to achieve the goal of improving training in Work Zone Safety, the Safety and Traffic Engineering Branch is utilizing Technical Training funding to provide the initial certification for the following CDOT individuals: Construction Project Personnel - CEPMs, Project Engineers, EPSTs; Maintenance Personnel –TMs. CDOT new hires need to complete the two (2) day training through the Colorado Contractor's Association (CCA), within 12 calendar months of their hire date, and re-certify accordingly there-after.

#### **Contractor Personnel**

The TCS training requirements for Contractor Personnel are included in the contract documents. The contractor will need to arrange for the training of their personnel using the approved vendor.

#### **Consultant Personnel**

Consultant personnel performing oversight duties on CDOT construction projects must meet the same requirements as CDOT personnel.

**OUTCOMES:** Upon completion of this course, participants will be able to:

- Read and interpret traffic control plans for implementation in the field
- Recognize, analyze, correct, and document deficiencies
- Be an effective Supervisor who can effectively oversee personnel in the field
- Demonstrate a comprehensive knowledge of work zone standards guidelines, installation, removal procedures, inspection, documentation and supervisory skills.

**CONTINUING TRAINING REQUIREMENTS:** Recertification through CCA shall be limited to CEPMs, Project Engineers, EPSTs; and Maintenance Personnel; and should occur no later than one day prior to the current expiration, which is three years from date of prior certification. If re-certification is not met, prior to certification expiring, the two day class shall be required.

## **Traffic Control Supervisors Training (*cont'd*)**

### **SPECIFICATION REQUIREMENTS:**

The specifications covering these requirements for Contractor personnel on CDOT projects are contained in the most current version of CDOT's Standard Specifications for Road and Bridge Construction and CDOT Standard Special Provisions.

For the most current information regarding versions of these specifications please refer to:

<https://www.codot.gov/business/designsupport/2011-construction-specifications/2011-Specs>

For questions regarding these specifications, contact the Safety and Traffic Engineering Branch at 303-757-9662.

Training contacts and procedures are handled through CDOT public announcements, the internal web, and my learning.

**If you have questions about this CDOT training, please contact CDOT Safety and Traffic Engineering Branch (Engineering Personnel) at 303-757-9662.**
