

# Reliability Overview

## Travel Delays – Recurring and Non-Recurring Congestion

With an increasing number of residents and drivers on our roadways, nearly all Colorado drivers experience – and plan around – traffic congestion as part of their daily activities.

Corridor travelers complain that unexpected and unreasonably long traffic delays are becoming more common, even the norm.

### How FHWA Describes Travel Time Reliability

### Real Time Travel Time Data – INRIX Database

- Interactive database of travel times based upon actual driver data, anonymously collected from GPS devices, like mobile phones
- Real time and historic traffic data to 2011
- Data accuracy has been independently verified by CDOT
- Numerous data collection points along the I-25 corridor
