

## Word Problems

MATH: 4th - 5th Grade

Help Walter, the Central 70 Project pooch, solve the following word problems.

#1

The art fence outside Swansea Elementary school is 11 feet tall. But the school decided to change to a taller fence that is 14 feet tall. How much taller is the new fence?

#2

Santiago was 4 foot 11 inches tall last year. He grew 6 inches in the past year. How tall is he now?

#3

Bianca's laptop computer is 13 inches long. The width is 3 inches longer than the length. What is the width of Bianca's computer?

#4

The pink poster is 1 foot 4 inches wide, and the blue poster is 19 inches wide. Which one is wider?

#5

The workbench is 3 foot 1 inch long. If four workbenches are put alongside in the gym, what is the total length of four benches?

#6

Sophia has a piece of string that is 24 inches long. If she divides it into six equal pieces, what is the length of each piece of shorter string?
