

# Fountain Creek Flood Risk Reduction Project

- Raising and widening the bridges over Fountain Creek
  - US 24 Bridge just east of 21st Street
  - On all north-south street bridges
- Removing the bridge at 25th Street
- Constructing wing walls at each bridge
- Re-grading the channel from the wing walls to meet existing conditions.

The Army Corps of Engineers, FEMA and the floodplain administrator will provide guidance if additional creek work should be done.
