

# I-70/Kipling Interchange

## INTERCHANGE RECONSTRUCTION PLANNED

In late 2016, the Colorado Department of Transportation began the National Environmental Policy Act (NEPA) and Preliminary Design phase for improvements at the I-70/Kipling Street interchange. Following a public meeting held in March 2017, the Diverging Diamond interchange configuration was confirmed as the Preferred Alternative. This new configuration is expected to provide improved operations and substantial safety benefits for all modes of travel.

Analysis of the benefits and impacts of the improvements is underway, and will be documented in an Environmental Assessment document. Construction is not yet fully funded, but completing this study and preliminary (30%) design will allow the project to quickly move forward when funding is obtained.

## PUBLIC MEETING NOVEMBER 30, 5:00 - 7:00 PM

Join us at our upcoming public meeting where we'll share information and gather public feedback regarding the latest project design. Your input is important, and will be considered by CDOT and the Federal Highway Administration prior to finalizing the Environmental Assessment.

## HOW WILL A DIVERGING DIAMOND OPERATE?

Traffic on Kipling Street will cross to the opposite side of the road as they travel under I-70 through the interchange. Left turns onto and off of the I-70 ramps will not cross conflicting traffic, resulting in fewer crashes and improved traffic flow. For details, visit the project web page (see reverse).
