# DON'T BE BLINDED BY THE

---

## LIGHT

Don't be tempted to text while behind the wheel. The distractions are dangerous to your passengers and other drivers. And, with the new law effective December 1st, being distracted by the blinding light of your cell phone could lead to the blinding lights of a cop car in your rearview mirror. So, put down your phone - your friends can wait.

**No text is worth the ticket.**
